*Response to Amendment*

*Claim Rejections - 35 USC § 103*

Claims 1-101 are rejected under 35 U.S.C. 103(a) as being unpatentable over Feierstein et al (4,162,236).

*Response to Arguments*

1. Applicant's arguments filed 2-26-04 have been fully considered but they are not persuasive.

Applicant argues that the 2-phenyl content disclosed in Feierstein et al does not encompass the claimed invention.

The examiner contends that the content disclosed in Feierstein et al, the examiner does agree with applicant that the "60%" describes the 2-phenyl content of the alkyl chains having 12 or more carbon atoms. Therefore, the general teachings in Feierstein et al teach that the 2-phenyl content of the alkyl benzene is determined by the catalyst and reaction temperatures and it is necessary to separate the alkyl benzene having high 2-phenyl content from alkyl benzenes wherein the aromatic moiety is at other than 2-phenyl positions on the chain (col. 2, lines 47-53). Moreover, the catalyst have been described at column 2, lines 17-30 and applicant specifically noted Table 1 wherein the preferred embodiment is used. However, applicant has not shown any criticality with respect to the other catalyst disclosed. Accordingly, it would have been obvious to one skilled in the art, absent a showing to the contrary, to increase the 2-phenyl content of said alkyl benzene sulfonate by reacting the alkylated catalyst with the olefin to produce a higher 2-phenyl content as disclosed by Feierstein et al.

Art Unit: 1751

Disclosed examples and preferred embodiments do not constitute a teaching away from a broader disclosure or nonpreferred embodiments. In re Susi, 440 F.2d 442, 169 USPQ 423 (CCPA 1971). "A known or obvious composition does not become patentable simply because it has been described as somewhat inferior to some other product for the same use." In re Gurley, 27 F.3d 551, 554, 31 USPQ2d 1130, 1132 (Fed. Cir. 1994).

"[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).

"The Patent Office bears a lesser burden of proof in making out a case of prima facie obviousness for product-by-process claims because of their peculiar nature" than when a product is claimed in the conventional fashion. In re Fessmann, 489 F.2d 742, 744, 180 USPQ 324, 326 (CCPA 1974). Once the examiner provides a rationale tending to show that the claimed product appears to be the same or similar to that of the prior art, although produced by a different process, the burden shifts to applicant to come forward with evidence establishing an unobvious difference between the claimed product and the prior art product. In re Marosi, 710 F.2d 798, 802, 218 USPQ 289, 292 (Fed. Cir. 1983).

### ***Conclusion***

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1751

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
